Cyber Resilience
in the Age of AI
COMPANY PROFILE

Along with the countless opportunities the era of digital transformation and AI present, comes a fast evolving and expanding threat landscape. Threat-Actors move at a faster pace than organizations can react, creating a global concern over the breadth and depth of destruction cyber-attacks can cause.

With an innovative and forward-thinking mindset and a rich skillset, we have been successfully guarding our clients' digital ecosystems for the past two decades by helping them build cyber-resilience.

Through our 360° Holistic Approach for Achieving Cyber Resilience, we address the high volatility of the threat landscape by empowering our clients build digital ecosystems capable of anticipating, responding, withstanding, adapting to adverse conditions and quickly recovering from disruptive attacks.

At Odyssey we are missioned to Secure your Cyber Resilient Future

The New Reality

In an era where Cyber Threats evolve and scale at unprecedented speed, often with a high degree of autonomy, traditional cybersecurity tools and practices are no longer sufficient to address this level of sophistication. AI-powered reconnaissance and automated exploitation have elevated digital risk to a critical business concern. To remain competitive and secure, organizations must move beyond static defense models and embrace Cyber Resilience.

Gartner Magic Quadrant for Security Event Management Systems and Data Impact Award for the "Most Admirable Architecture", both for our ClearSkies™ TDIR Platform. Also, several service excellence and innovation awards from national and international bodies.

Who We Are

For over two decades, Odyssey has been at the forefront of cybersecurity, pioneering the transition from traditional, defense-centric models to a resilience-driven approach aligned with the realities of the AI era. We combine deep human expertise with advanced AI-powered automation to help organizations anticipate, withstand, and rapidly recover from cyber disruptions.

Supporting global enterprises, critical infrastructure operators, and complex supply chains, we deliver intelligence-driven protection that extends beyond detection and response to enable continuous operational resilience, regulatory alignment, and sustained business trust in an increasingly volatile digital landscape.

ODYSSEY 360° HOLISTIC APPROACH FOR ACHIEVING CYBER RESILIENCE

We apply a 360° holistic approach in helping our clients achieve cyber resilience, treating cybersecurity as a **designed & controlled** business risk rather than a reactive technical challenge. Through this optimized approach, built on two decades of engagement in the cybersecurity arena, we enable your organization to **Anticipate, Withstand, Adapt** to adverse conditions and **Recover** quickly from disruptive cyber-threats in a controlled and predictable manner, while meeting compliance obligations.

This holistic approach consists of solutions, services and product offerings classified into **4-pillar mix**, managing risk across **People, Process, and Technology**. Each offering can achieve its intended purposes as part of your cybersecurity strategy, however, when carefully planned and implemented in combination, they are designed to work synergistically to establish control and resilience against emerging digital risks, helping your organization shift from a cyber defensive, to a **cyber resilient** and **controlled security posture**, all while maximizing the return on your cyber security investment.

OUR 4-PILLAR MIX

Managed Services

Resilience Meets Intelligence: Cybersecurity Managed, End-to-End.

AI-augmented security operations that act as a high-velocity extension of your team, cutting through noise to ensure continuous vigilance. Our Managed Security Services are built around two mission-critical service lines: Security Operations, focused on real-time threat detection and response, and Technology Resilience, ensuring the availability, integrity, and recoverability of your core systems and data.

Advisory Services

Compliance-driven strategy for resilient cyber risk management.

Strategic governance and AI-assisted risk modeling to navigate the rapidly evolving global regulatory and compliance landscape. Complementing our GRC offerings, IthacaLabs™ Threat Risk Assessment services provide independent, scenario-based security assessments that evaluate exposure, vulnerabilities, and configuration weaknesses across your business-critical assets, whether on-premises, in the cloud, or supporting AI workloads

Hybrid Integrated Solutions

Technology synergy built to protect and optimize your entire digital ecosystem.

Secure-by-design digital infrastructures deployed across cloud and on-premises environments, built to scale with your business. You gain access to cutting-edge products, tools, and methodologies designed to strengthen your digital ecosystem, optimizing security, reliability, adaptability, and scalability based on your strategic goals.

ClearSkies™ ISOC - The Intelligent SOC Platform

One Intelligent Platform.Every Capability Coordinated. Outcomes Delivered.

ClearSkies iISOC is an Integrated Security Operations Center platform. It replaces a set of separately-integrated products with one system that ingests, correlates, investigates, responds and measures, under one data model, one analyst workflow and one console.

Built on the award-winning ClearSkies platform, recognized in the Gartner Magic Quadrant for SIEM in 2021 and 2024, ClearSkies ISOC represents the next evolution of intelligent Security Operations.

DELIVERING PEACE OF MIND;
OUR WORLD CLASS PROFESSIONAL SERVICES

Our **Professional Services** expert teams are synergistically involved in delivering the offerings under our **4-Pillar Mix**. They collectively work to ensure well-designed, effective, efficient, and future proof solutions, services and products, by bringing a unique set of in-depth skills, all geared towards delivering peace of mind for our clients.

Furthermore, as part of our **Staff Augmentation as a Service** model, you can engage our Professional Services to complement or supplement your existing capabilities, thus gaining specialized resource scalability and flexibility to meet project demands or address specialized tasks, without the long-term commitment of expanding your in-house Cybersecurity and Risk Management teams.

WHY ODYSSEY
A STORY WITH HISTORY

OUR WHY

It's in Our Name

When we set sail over 20 years ago to create a company solely focused on Cybersecurity, we knew we were endeavouring into the unknown.

Much like the epic Homerian hero Odysseus, we set course into the uncharted threat landscape with only weapons, our firm belief in the importance cybersecurity would play in the new industrial revolution era and our determination to use our knowledge, expertise and understanding, to innovate and break ground in finding **Possible Solutions to Impossible Challenges.**

OUR COMMITMENT

At Odyssey, innovation is a foundational principle. Foreseeing the rapid evolution of AI and its convergence with cybersecurity, we have and continue to invest in the development of innovative AI-driven solutions, technologies and capability development.

Rather than providing isolated tools, we empower organizations to systematically elevate their cyber resilience maturity.

Our mission is to enable our clients to confidently embrace the AI-powered future, by helping them ensure that operational continuity, regulatory alignment, and business trust are not aspirations, but certainties.

SINCE THEN AND STILL, THIS IS OUR ODYSSEY...

We maintain our course, steadfast toward our mission to **Make the World a Cyber Safer Place**. Along this exciting journey, we have gathered wisdom, foresight and resources, which are the value we bring to our clients... **in securing their cyber resilient future**.

WE KEEP YOU UNDER CTRL IN THE AGE OF AI ERA
